

The **Vesting Module** enables controlled token distribution over time to contributors, team members, investors, and other stakeholders. This module provides transparency and predictability for token releases while maintaining ecosystem stability through gradual emission schedules.

Users can monitor their vesting progress, view emission charts, track claimable amounts, and manage their vesting events through an intuitive dashboard interface.

Dashboard Overview

The vesting dashboard displays **comprehensive vesting metrics** and provides three main event views:

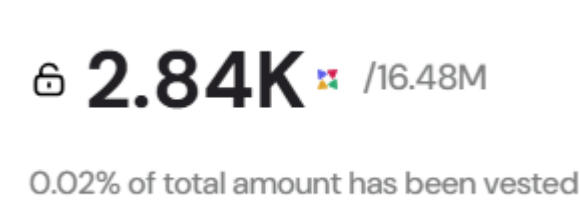

- **Ongoing Events** – Currently active vesting schedules
- **Upcoming Events** – Future vesting batches yet to begin
- **Completed Events** – Finished vesting schedules

Users can seamlessly switch between these views to monitor active vesting progress, preview upcoming distributions, and review completed vesting history.

Vesting Metrics

The dashboard displays comprehensive vesting statistics and personal tracking information.

Vesting Progress Overview

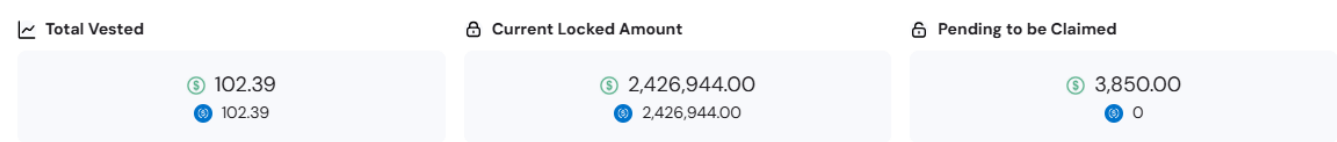

The vesting progress section displays:

- **Current Vested Amount** – Shows tokens currently vested out of total allocation (e.g., 2.84K /16.48M)
- **Progress Percentage** – Indicates the percentage of total allocation that has been vested to date
- **Lock Icon** – Visual indicator showing that tokens are part of a controlled vesting schedule

This section provides a quick overview of overall vesting progress across all active schedules.

Key Vesting Statistics

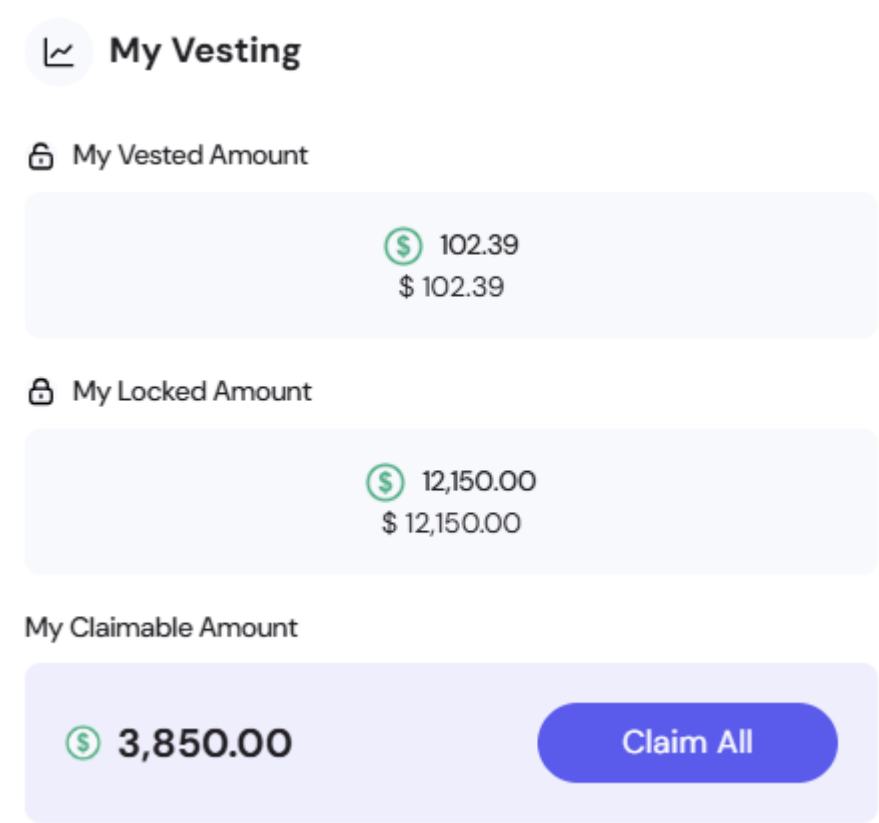

System-Wide Metrics:

- **Total Vested** – Aggregate tokens released across all participants
- **Current Locked Amount** – Tokens currently locked in active vesting schedules
- **Pending to be Claimed** – Vested tokens available for withdrawal

Personal Metrics:

The **My Vesting** section provides personalized vesting information.

Metrics

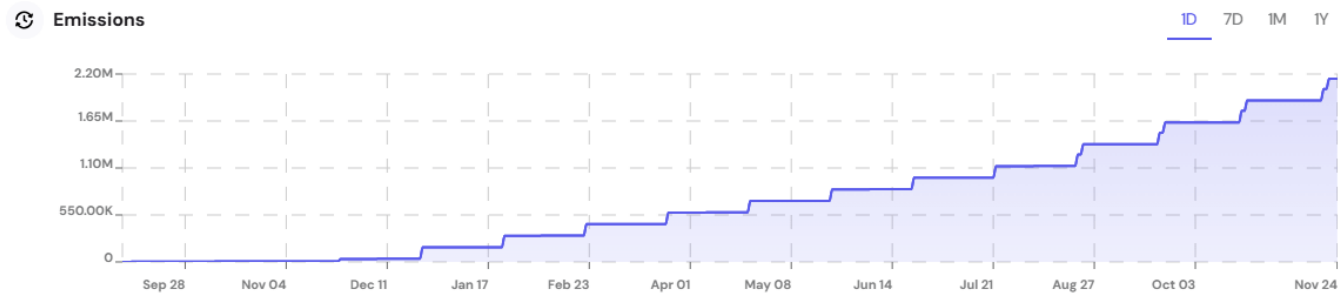

- **My Vested Amount** – Total tokens you've received with USD value

- **My Locked Amount** – Your tokens currently locked in vesting
- **My Claimable Amount** – Tokens ready for immediate withdrawal

Claim Functionality

- **Claim All Button** – One-click claiming of all available vested tokens

Emissions Chart

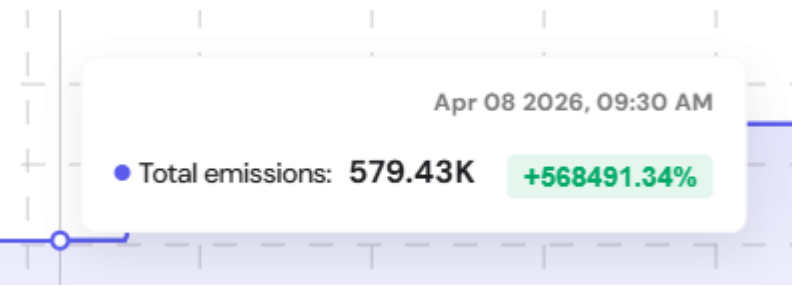

The emissions chart provides visual tracking of token release over time with an interactive timeline display.

Chart Features

- **Timeline View** – Historical token releases displayed over months with cumulative growth
- **Time Filters** – Toggle between 1D, 7D, 1M, and 1Y views in the top-right corner
- **Interactive Tooltip** – Hover over data points to see specific emission details, timestamps, total emissions amount, and percentage changes
- **Cumulative Display** – Shows total accumulated emissions as a rising line chart over the selected time period

Tooltip Information

When hovering over chart data points, the tooltip displays:

- **Date and Time** – Specific timestamp for the data point
- **Total Emissions** – Cumulative token amount released up to that point
- **Percentage Change** – Growth percentage showing emission changes from baseline

Vesting Events

The vesting events table displays detailed information about all vesting schedules.

Event Categories

- 1. **Ongoing Events** – Active vesting schedules currently distributing tokens
- 2. **Upcoming Events** – Future vesting batches scheduled to begin
- 3. **Completed Events** – Finished vesting schedules

Event Details

Each vesting event displays detailed information depending on its lifecycle stage.

Ongoing Events:

Ongoing Events						
Batch Name	Vesting Period	Chain	Recipients	Cliff Length	Total Amount	Status
Advisor Allocation Batch	12 months		1 Recipient	No Cliff	\$ 1,000.00 0.00 Claimed	349 days remaining Claim 100.00 Sharing
Marketing Department Equity Pool	365 days		1 Recipient	No Cliff	\$ 15,000.00 0.00 Claimed	357 days remaining Claim 0 Sharing
3 of 3						

- **Batch Name** – Descriptive identifier for the vesting schedule
- **Vesting Period** – Duration of the token release schedule (displayed as clickable link)
The format (seconds, days, weeks, or months) depends on the chosen distribution frequency when the batch is created.

Vesting Period

[12 months](#)

Start Time

Fri Sep 05 2025

End Time

Mon Aug 31 2026

- **Chain** – Blockchain network where vesting occurs (indicated by network logo)
- **Recipients** – Number of participants in the vesting batch (clickable to view recipient details)

Recipients

Oxa5AF486F08a336725336b119D5E282Fd30C68870

Recipient 0

(Oxa5AF486F...8870)

900.00 Sharing

Total token allocation

- **Cliff Length** – Initial lock period before vesting starts (shows "No Cliff" if none configured)
- **Total Amount** – Total tokens allocated with claimed/unclaimed breakdown
- **Status** – Shows the time remaining until the vesting schedule is completed
- **Claim Button** – Appears only for ongoing events, showing claimable amount
