

The Pools Dashboard is your main control center for managing lending and borrowing on the Defactor platform. It brings together key metrics, liquidity insights, and quick actions so you can easily track pool activity and manage your positions.

Dashboard Overview

The pools dashboard displays:

- **Total Value Locked (TVL)** – Overall assets supplied across pools
- **Pool Utilization Chart** – Interactive chart tracking supply, borrow, and available liquidity over time
- **Pool Activity Summary** – High-level metrics for available liquidity, historically borrowed, and historically supplied assets
- **Personal Performance Metrics** – Track your borrowing, lending, and collateral safety
- **Active Pools Table** – Manage live pool positions with supply/borrow actions

Key Metrics Overview

Total Value Locked (TVL)

Large numerical display showing **total value locked**, placed centrally to highlight its importance.

Reflects the total value of assets you have supplied to pools.

Pool Utilization Chart

Interactive Time Series Visualization

- Multi-line chart with filters: **1D**, **1W**, **1M**, **1Y**

Chart Legend

- **Supplied** – Assets you’ve provided to pools (green line)
- **Borrowed** – Assets borrowed from pools (red/pink line)
- **Available** – Available liquidity in pools (blue line)

Pool Activity Summary

Three key metrics displayed in a dedicated panel:

- **Available** – Current liquidity available for borrowing (green indicator)
- **Historically Borrowed** – Cumulative borrowed amount (red indicator)
- **Historically Supplied** – Total assets supplied over time (blue indicator)

Statistics Panel

Personal Performance Metrics

- **Active Borrows** – Number of active borrowing positions
- **Positions Repaid** – Historical total of completed loan positions
- **Interest Earned** – Real-time earnings from supplied assets
- **Collateralization Ratio** – Current ratio measuring safety of borrowed positions

Pools Management Section

Status Tabs

- **Active** – Currently operational pools
- **Closed** – Completed or inactive pools

 **Supply**

Supply Process

1. Click **Supply / Borrow**
2. Select **Supply**
3. Enter desired amount (within limits)
4. Confirm transaction

Borrow Process

1. Click **Supply / Borrow**
2. Select **Borrow**
3. Enter desired amount (within limits)
4. Confirm transaction

Dashboard Benefits

- **Comprehensive Portfolio View** – All positions visible at a glance
- **Risk Assessment Tools** – Collateralization ratio and health monitoring
- **Yield Optimization** – APR comparison across pools
- **Historical Analysis** – Performance tracking over time
- **Multi-pool Management** – Manage multiple positions from one interface
- **Real-time Liquidity** – Instant visibility of available borrowing capacity
